Subject: RE: re Draft protocol TES

Dear Jan,

I reviewed the protocol, but I did not find anything in addition to the topics already covered by Tony's response.

I agree with Tony that we should not change our requirements concerning the validation status of the methods used. Do we have any validation documents on the new methods for NNK metabolites? If yes, would it be possible to share them with me?

Best regards
Klaus

Subject: re Draft protocol TES

Dear All,

Please review the revised draft protocol and send your comments to Valerie by Jun 21.

Thank you for your help,
Jan
